Metadata for Hamidiyah Data Set

Title: Hamidiyah Data Set

Description: This dataset contains comprehensive data related to [specify the focus of the dataset, e.g., demographics, economic activities, health, etc.]. It includes detailed information on beneficiary status, demographics, economic activities, and access to services. The data can be used to analyze trends, economic empowerment, and the impact of interventions across different regions and time periods.

Structure:
- **id** (Integer): Unique identifier for each record. Example: 1
- **year** (Integer): Year of the data collection. Example: 2019
- **uniqueid** (String): Unique identifier for each individual. Example: "AN001C"
- **beneficiary_status** (String): Status of the beneficiary. Example: "Beneficiary"
- **BL_State** (String): State of the beneficiary. Example: "Anambra"
- **Zone** (String): Geopolitical zone. Example: "SE"
- **agerange** (String): Age range of the beneficiary. Example: "36-45"
- **gender** (Integer): Gender of the beneficiary (1 for male, 0 for female). Example: 1
- **hhsize** (Float): Household size. Example: 9.0
- **Nature_Access_credit** (String): Nature of access to credit. Example: "Formal"
- **treatment** (Integer): Treatment status. Example: 1
- **empowermentindex_percent** (Float): Empowerment index in percentage. Example: 60.0
- **Income_Agric_percent** (Float): Percentage of income from agriculture. Example: 33.89602
- **Agerange** (String): Repeated age range. Example: "36-45"
- **zone** (String): Repeated zone information. Example: "SE"
- **Formaleducation** (String): Level of formal education. Example: "Secondary"
- **Dominant_Enterprise** (String): Dominant type of enterprise. Example: "producer"
- **extension_access** (Integer): Access to extension services. Example: 1
- **MaritalStatus** (String): Marital status of the beneficiary. Example: "Married"
- **Income_Non_Agric_percent** (Float): Percentage of income from non-agricultural sources. Example: 47.40041

Context:
- **Source**: Data collected from various states over the period from 2019 to 2022.
- **Collection Method**: The data was collected through surveys and administrative records.
- **Time Period**: January 2019 to December 2022.
- **Geographic Coverage**: Various states in Nigeria.

Usage Notes:
- **Limitations**: The dataset includes only individuals who were beneficiaries of certain interventions.
- **License**: Data is licensed under the Creative Commons Attribution 4.0 International License.
- **Related Datasets**: Additional datasets may include specific demographic or economic data for comparative analysis.

Technical Information:
- **Format**: CSV (.csv)
- **Size**: 98 columns across multiple records (adjust based on actual columns).
- **Tools and Software**: Compatible with Excel, Google Sheets, and data analysis tools like Python and R.
